

"Amani" - Swahili word for "Peace"!

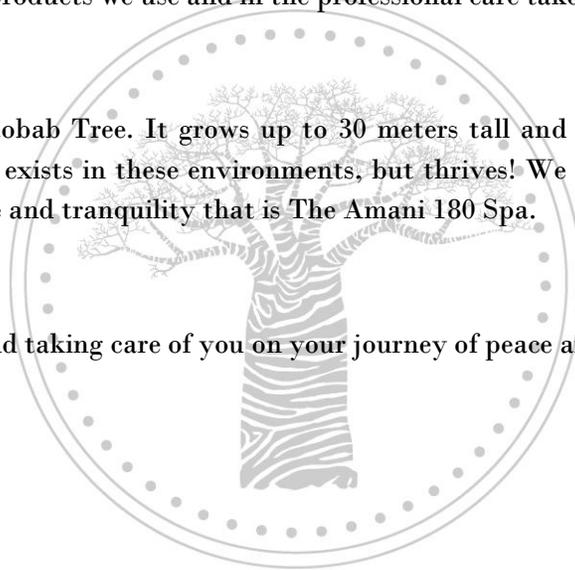

The Amani 180 Spa is a hideaway and refuge on the beautiful Greek Island of Alonissos, in The Sporades. The azure, clean waters of the marine park are reflected in the purity of the products we use and in the professional care taken to treat our clients.

The symbol of The Amani 180 Spa is the Baobab Tree. It grows up to 30 meters tall and up to 50 meters in circumference in the harsh African Savannah. The Baobab tree not only exists in these environments, but thrives! We hope that these qualities of strength, resilience and endurance will be yours through the peace and tranquility that is The Amani 180 Spa.

I look forward to personally welcoming you and taking care of you on your journey of peace and relaxation.

Spa Manager

Luke Wood

Massage is one of most ancient healing forms. It is found throughout human history, in all civilizations and traditions. To imagine a world without massage is like imagining a world without physical touch.

The benefits of a good massage are innumerable, as it impacts all the systems of the human body - from skeleton and muscles, to skin, fluids, soft tissues, internal organs and glands. Even a 10 minute massage can dramatically change our psychology, our breathing and heart rate as well as our nervous system condition.

At The Amani 180 Spa we have selected, from the world of massage, what we consider to be the most beneficial and effective treatments for you. We encourage you to speak openly to your therapist about any issues you might be dealing with. This will help them to choose the best natural ingredients in combination with your chosen treatment, ensuring you get the maximum benefit from your Amani experience.

All our oil massages use essential oils for their healing powers, in combination with only the highest quality cold-pressed organic sweet almond oil. Inform us if you have any preferences or dislikes.

Specialty Massage

Lymphatic

70 mins. 80 €

The lymphatic system is an integral part of your body's immune system and helps protect you from infections and diseases. It is a very relaxing and valuable massage.

Asali "Honey"

30 mins. 50 €

60 mins. 90 €

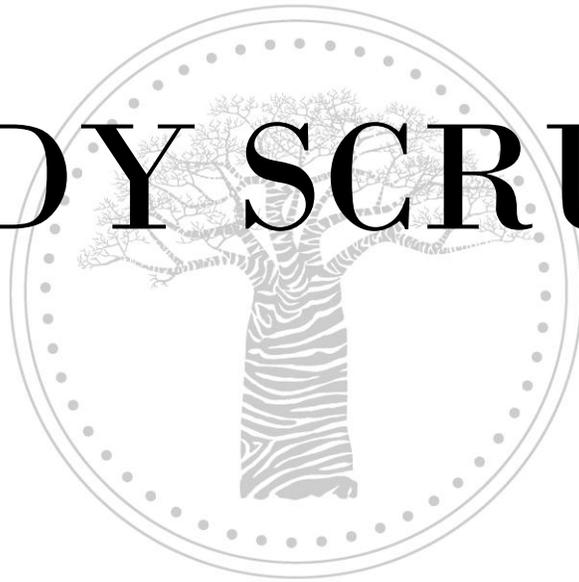

Honey is one of nature's real treasures. It is a potent antioxidant, decongestant and a strong detoxifier when applied in massage therapy. It is worked on the back and in areas with cellulite and when sticky, a "pumping out" action gently lifts the fascia and muscle and draws out toxins. Those toxins will be removed from your skin with a hot towel at the end of the treatment. Almond oil with lavender will be applied after this. It is a detoxifying treatment that nourishes the skin while dissolving any trace of heaviness or fatigue.

Reflexology is extremely powerful in alleviating pain and discomfort, and in many cases produces immediate results. It is a deep massage of the soles of your feet mostly, promoting general well-being and relaxation. This will leave you utterly re-energized.
